

Memory AI

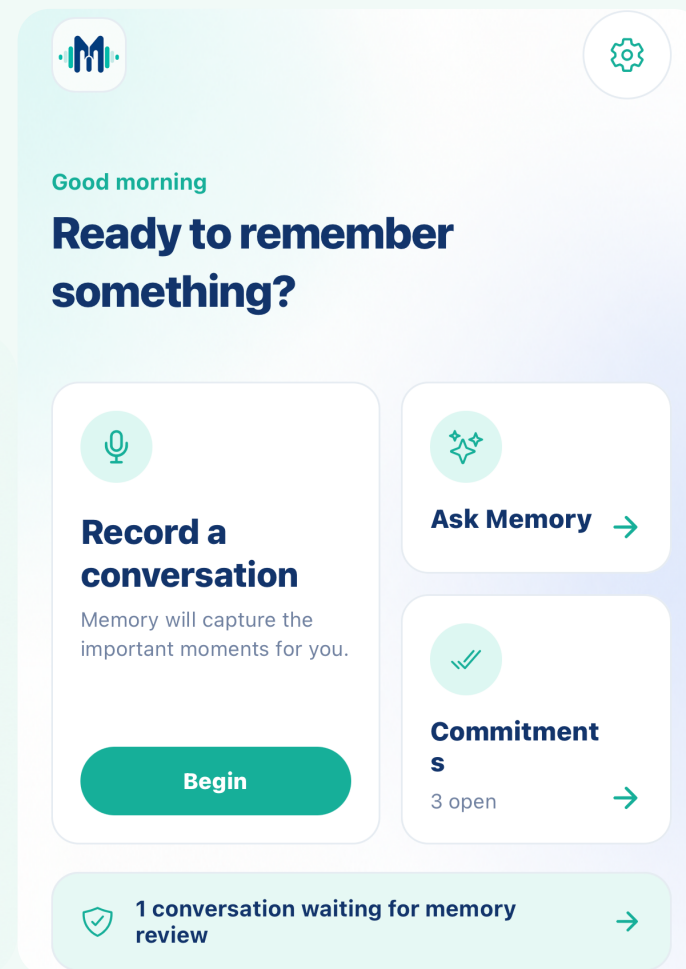

A memory for your
conversations

Record what matters.
Find the details later.

Product overview

Current MVP and planned capabilities. App screens contain fictional demo data.

The problem

Conversation details are easy to lose.

Forgotten details

“What did we decide?”

Scattered notes

“Where did I save it?”

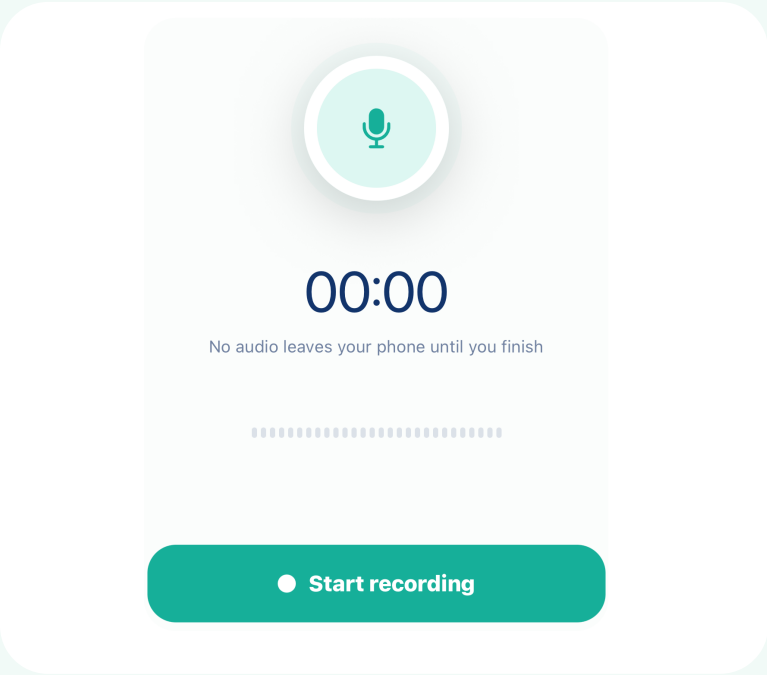

Missed follow-ups

“What did I promise?”

How it works

01 Record

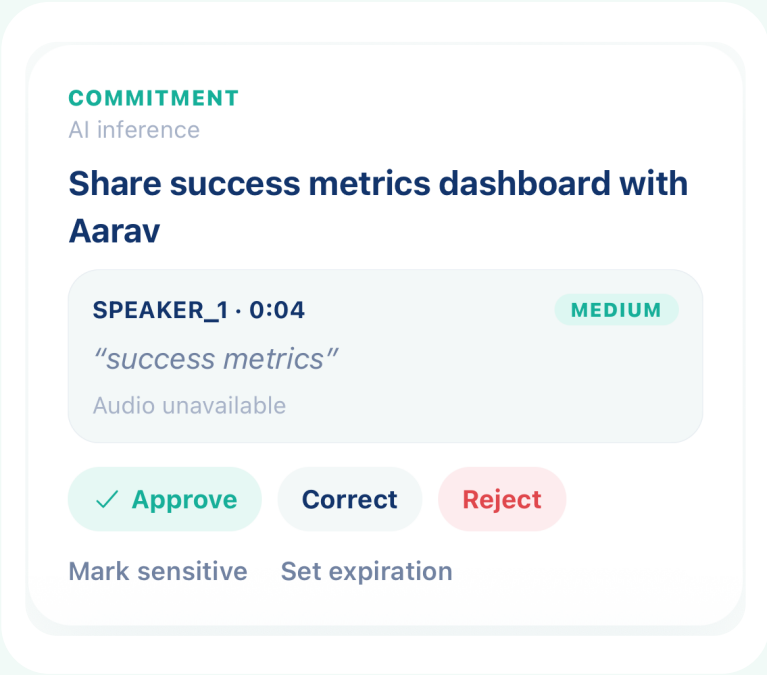

Capture a conversation.

Audio becomes a saved memory.

Actual app screens use fictional demo data.

→ 02 Review

Check the extracted details.

Keep or correct what matters.

→ 03 Recall

Ask a question later.

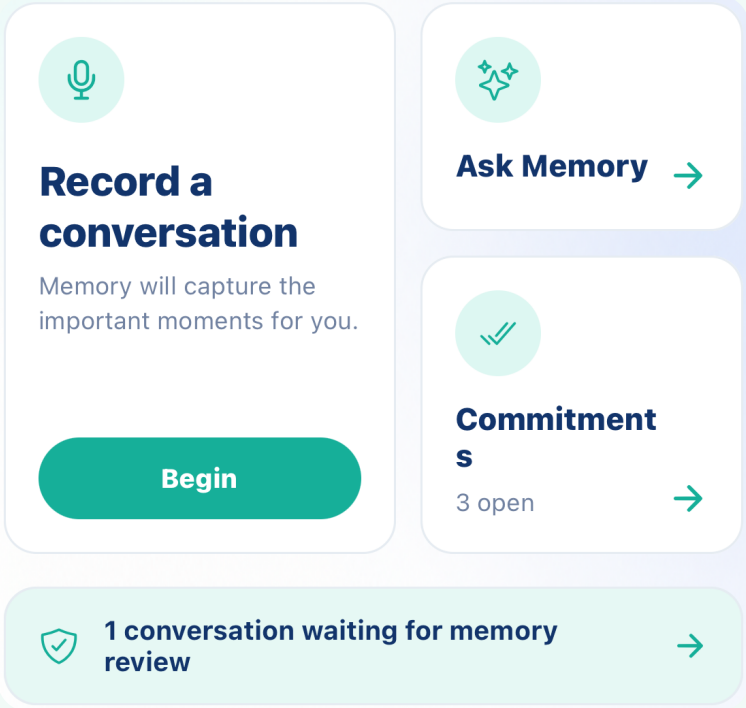

Return to the supporting source.

MVP overview

Conversation memory, with people and follow-through.

Ask your memory

Ask within a conversation
or across saved memories.

Follow source references
to the supporting memory.

What did I promise Aarav last week?

Memory

You agreed to send the revised Atlas proposal by Friday, with a tighter executive summary and both pricing options A and B.

People and commitments

People profiles

Last time with Aarav Mehta

You promised to Send revised Atlas proposal by Friday.

Waiting on revised proposal by Friday

Conversation history
and preparation briefs

Mark sensitive

Set expiration

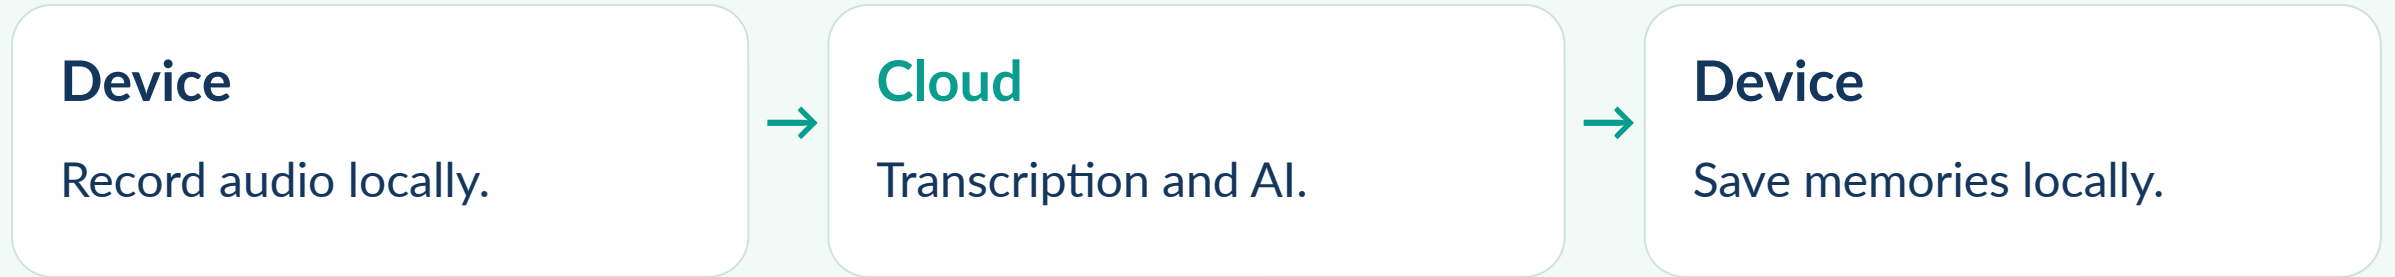

Replay evidence

Listen to the source when audio is retained.

Sensitive labels and expiry controls

Privacy and storage

Cloud handoff is temporary. Permanent memories stay on the device.

Biometric app lock

Biometric lock

Require your fingerprint, face, or device passcode when opening Memory.

The lock protects app access, not database encryption.

Future: Calendar sync

Planned

Event context linked to memories

Easier preparation before meetings.

Concept illustration and fictional demo screen. No vendor, launch date or delivery order is promised.

Current prep brief

Before meeting Aarav Mehta

Assembled from approved memory on this device.

LAST CONVERSATION

Client catch-up with Aarav

Friday

Discussed the revised Atlas proposal, pricing options, and a Friday delivery commitment. Aarav prefers a shorter executive summary and clearer success metrics.

Prep briefs exist today.
The calendar connection is planned.

Future: Online meeting notetaker

Planned

Meeting capture

Capture online conversations.

AI notes

Transcripts and summaries.

Follow-ups

Decisions and commitments.

Future: Folders

Planned

Organize by project, client or personal topic.

Illustrative folder structure

Memories

Illustrative hierarchy for planned folders and subfolders.

Current and planned

Capability	Current MVP	Planned
Recording + saved audio	Implemented	
Transcripts + AI notes	Implemented	
Ask with sources	Implemented	
People, prep + commitments	Implemented	
Review, export + privacy controls	Implemented	
Calendar sync		Planned
Online meeting notetaker		Planned
Folders + subfolders		Planned

Current = implemented in this repository. Planned = proposed, with no dates or delivery order.
